

# TWIN DISC POWER COMMANDER® EC100RE

## Hand-Held Electronic Propulsion Control

The Twin Disc Power Commander® Remote Hand-Held Control gives boat operators total control of the engine and clutch from virtually anywhere on the boat. This portable control puts Power Commander electronic precision at the operator's fingertips. It is as simple to operate as the Power Commander fixed station. Indicator lights and clear markings make it easy to determine direction and throttle position. Docking maneuvers and deck tending can be executed from almost any vantage point on the deck.

**Power Commander Remote Hand-Held Controls** are available for single or twin-engine boats, with or without bow and stern thruster controls.

*For precise boat handling in stern-facing situations, you can turn the control unit around and operate it with the same intuitive orientation as you would while bow-facing.*

*From the Family of Twin Disc  
Critical Performance Products*

## **FEATURES:**

**Waterproof, high impact resistant plastic housing.**

**60 feet of flexible cable.**

**Positive detents for ahead, neutral and astern control knob positions.**

**Graduation marks provide clear position indication.**

**Red indicator light beside each engine control provides visual confirmation of station in command.**

**Built-in station transfer button.**

**Built-in emergency engine shut down button.**

**A safety lanyard to be attached to the operator's wrist. If the unit is dropped, the lanyard disconnects from the back of the unit; the engine is instantly throttled down and the gears are put into neutral.**

**Optional bow thruster and/or stern thruster control switches available.**

**A 24 month warranty against defects in material and workmanship.**

**An easy addition to a Power Commander control system.**
